

Duo

- *Self Propelled, battery powered, bedding dispenser and cubicle brush*
- *Spreads a wide variety of bedding and disinfectants*
- *Environmentally friendly*
- *Rechargeable battery*

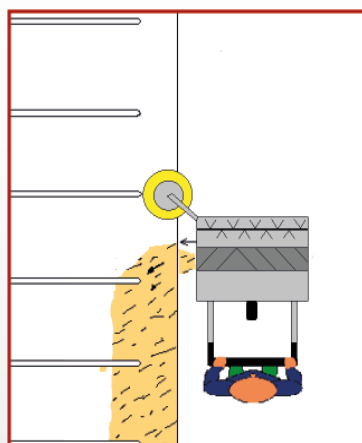

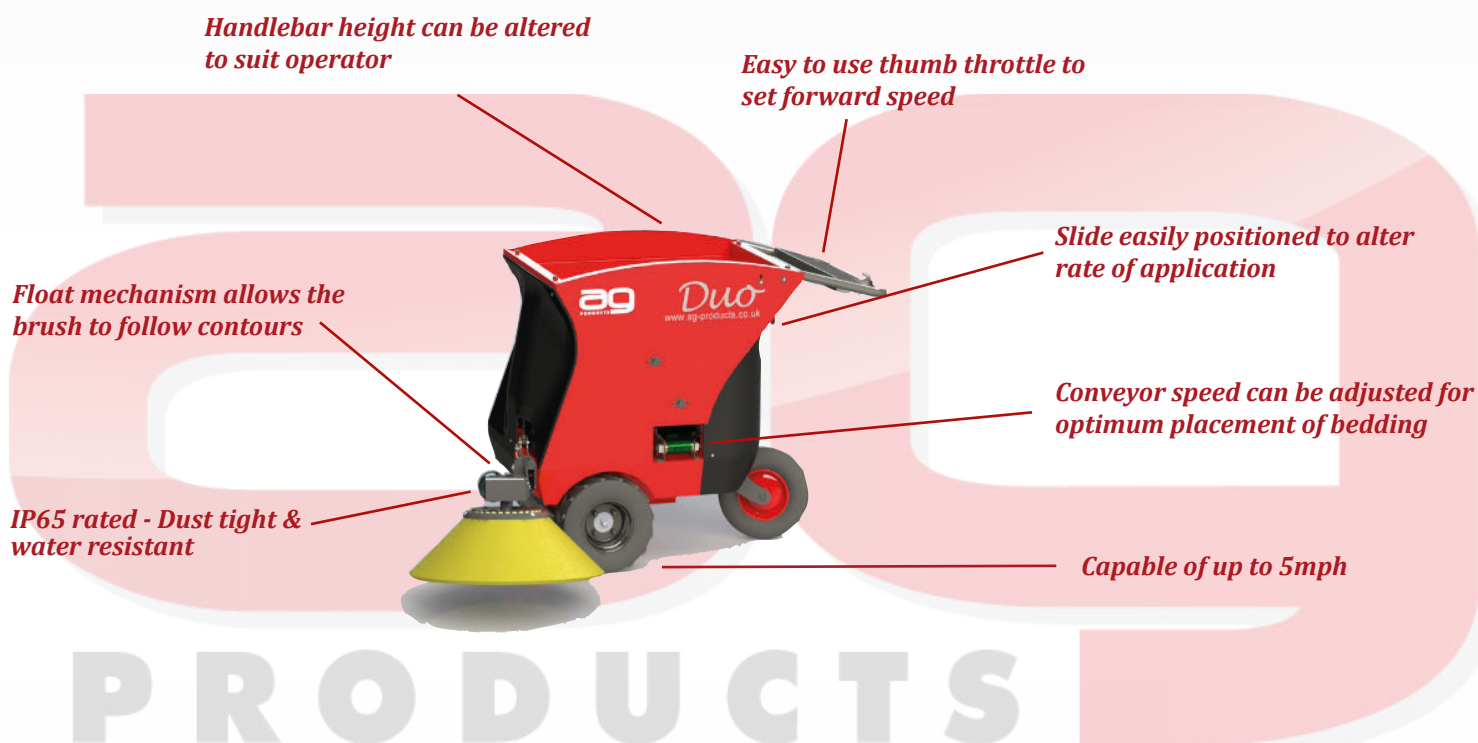

Duo

The AG Duo combines a dispenser with a motorised brush, allowing the efficient and consistent management of cubicles.

The Duo cleans the bed to the highest standard while quickly and efficiently spreading bedding or disinfectants. The use of a powered axle minimises operator fatigue and the differential in the axle makes turning the machine effortless.

Low maintenance compared to engine powered machines - no radiators to block, no filters or oil to change.

The Duo is filled manually and then the battery powers motors that provide drive to the axle, auger and conveyor.

- Low noise output allows it to be used around cattle
- Battery has the capacity to bed up to 1,000 cubicles
- The dual functions reduce labour costs

Drum capacity(l)	350
Distribution method	Conveyor belt
Machine weight(kg)	320
Discharge height(m)	0.55
Spread distance(m)	1.2
